### About Me

As a passionate **Front-end developer** keen on mathematics and sports, I embrace this field's challenges and constant evolution. With proficiency in **React, Redux, JavaScript, HTML, CSS, Sass/Less, BEM, TypeScript, and Git/GitHub**, I thrive on staying up-to-date with ever-changing technologies, frameworks, and tools.

My soft skills include effective teamwork, conflict resolution, and self-motivation. Through expanding the client base and exploring new markets, I achieved a remarkable **17% increase in sales volumes** in recent years.

I aim to expand my expertise by learning **Vue, Angular, and React Native**. My **English Level is Intermediate**, and as I am improving my proficiency, I will definitely enhance client communication, understanding of requirements, and confidence articulation of innovative solutions.

### Experience

#### Frontend Developer (From 2022)

- Developed **10 diverse React applications**, utilizing class components, hooks, and React routers, while implementing data processing functionality and client-server communication through APIs
- Provided quality code reviews for over **40 projects**, offering valuable suggestions and comments to team members and colleagues
- Ensured clean, maintainable, and easily readable code (**2k+ lines**) while adhering to best practices and utilizing professional documentation
- Proficient in application state management using Redux and Redux Toolkit for large and complex applications
- Demonstrated expertise in creating high-quality webpages (10 HTML/CSS projects) from design to deployment, incorporating HTML, CSS, SASS, and JS, including animations and React transitions.
