SKILLS

Typescript ·

JavaScript (ES2015–2019) · React ·

Redux · Next · Vue · Nuxt · HTML5 ·

CSS3 · Less · Sass (SCSS) · BEM ·

Axios · Postman · MUI · Bootstrap ·

Git/GitHub · VS Code · WebStorm ·

Chrome Developer Tools (incl. React) ·

NPM · Figma

Management metodologies: ·

Knowledge of SDLC · Waterfall ·

Agile concepts (Scrum, Kanban) ·

Notion · ClickUp · Trello · Jira

Basics of: · OOP understanding ·

Algorithms and Data Structures · SQL ·

Docker · NodeJs

SUMMARY

As a passionate **Front-end developer** keen on mathematics and sports, I embrace this field's challenges and constant evolution. With proficiency in **React, Redux, JavaScript, HTML, CSS, Sass/Less, BEM, TypeScript, and Git/GitHub,** I thrive on staying up-to-date with ever-changing technologies, frameworks, and tools.
My soft skills include effective teamwork, conflict resolution, and self-motivation. Through expanding the client base and exploring new markets, I achieved a remarkable **17% increase in sales volumes** in recent years.
I aim to expand my expertise by learning **Vue, Angular, and React Native**. My **English Level is Intermediate,** and as I am improving my proficiency, I will defenitely enhance client communication, understanding of requirements, and confidence articulation of innovative solutions.

EXPERIENCE

Frontend Developer
Date period

Charity Organization "Project Future"

- Organization dedicated to supporting veterans and their families, focusing on their well-being and successful reintegration into civilian life
- Creating and maintaining the organisation's application, ensuring its user-friendly interface and correct operation on all devices.
- Develop interactive interfaces to display information about programmes and services provided to veterans and their families.
- Collaboration with other teams, including designers and the customer's team, to perform common tasks and achieve the organisation's goals.
- Creating a payment system: Developing an interface for processing donations, including the ability to choose the amount, convenient payment method and fill in the necessary data.
- Installing and configuring Strapi on the server, including setting up the database and other parameters.Connecting Strapi with the front-end application to receive and display content on the website or application.

Frontend Developer
2022 - 2023

Freelance Projects

- Developed **10 diverse** React applications, utilizing class components, hooks, and React routers, while implementing data processing functionality and client-server communication through APIs
- Provided quality code reviews for over **40 projects**, offering valuable suggestions and comments to team members and colleagues
- Ensured clean, maintainable, and easily readable code (**2k+ lines**) following best practices and utilizing professional documentation
- Proficient in application state management using Redux and Redux Toolkit for large and complex applications
- Demonstrated expertise in creating high-quality webpages (**10 HTML/CSS projects**) from design to deployment, incorporating HTML, CSS, SASS, and JS, including animations and React transitions.

PROJECTS

Portfolio

Vue, pinia, vue-router, vue-i18n, Bootstrap, sass, axios, animate.css

This project is a dynamic and responsive portfolio created using Vue.js, which demonstrates my skills and experience as a front-end developer, and reflects my desire to keep up with modern web development technologies.

GitHub   **Demo**

Museum

HTML, CSS, BEM, Sass, JS, Figma

web page that showcases the exhibits, history, and unique features of the museum

GitHub   **Demo**

Cycle Hub

HTML, CSS, BEM, Sass, JS, Figma

The web page that highlights the diverse range of bicycles, accessories, and services offered by the shop

GitHub   **Demo**

Tasker

React, React-bootstrap, Bootstrap, Redux, Redux-persist

task management application built with React

GitHub   **Demo**

TileMerge

HTML, CSS, BEM, Sass, JS

game to merge numbered tiles to reach 2048

GitHub   **Demo**

Track the parcel

HTML, CSS, BEM, Sass, JS

application with the Nova Poshta API, with which you can track the status of your parcel

GitHub   **Demo**
